- Marangos J., (1997), "MAX Study Module", Department of Economics, University of Melbourne. Max is a study and revision tool to assist students in their study of Introductory Macroeconomics. MAX is an interactive process of learning that facilitates the development of skills necessary for students to answer correctly economics exam questions. The aim of MAX is to help students to identify correct statements and the mistakes of fellow students make when answering exam questions in Introductory Macroeconomics. Through this process instead of passively learning the concepts the student is able to reinforce and improve their knowledge by becoming an active participant through criticising and assessing the answer of another student.
